

INDUSTRIAL ELECTRICIAN

National Standard, a leading wire manufacturer, is seeking an experienced, safety-oriented Industrial Electrician who will be responsible for installing, troubleshooting and repairing plant electrical equipment. Hours are 7pm – 7am with a 36/48 hour per week schedule.

Qualified candidates will have previous experience in an industrial setting and will be experienced in the following:

- **AC and DC motor control centers**
- **PLC**
- **480 3-phase voltages**
- **Calibrate instrumentation**

A Journeyman card or equivalent certification is preferred.

We offer a competitive wage and complete benefits package including medical, dental, prescription, vision and life insurance, 401(k) and paid holidays.

Successful completion of a drug test and complete background check is required before hire.

EOE

When applying for this position, please include your answers to the following questions:

What is your hourly wage requirement?

How were you trained as an electrician?

In what setting did you obtain the majority of your experience?

Are you able to work 7pm-7am on a 36/48 hour week schedule?
